## EDUCATION

---

### TISHREEN UNIVERSITY

Syria, Latakia

- Bachelor in Information Technology Engineering

Sept 2021 – Oct 2026

## PROJECTS

---

### PIZZON

- Developed a responsive restaurant website using HTML, CSS, TypeScript, React, and Bootstrap, ensuring seamless user experience across devices. Leveraged TypeScript interfaces for robust data handling.
- Integrated a food API to dynamically fetch and display menu items, implementing a cart feature for convenient online ordering and order management.
- Implemented custom hooks like useContext and session storage for state management and data persistence, enhancing code modularity and user experience.
- Utilized styled components for efficient styling and maintainability of the codebase, promoting code reusability.
- Employed code splitting techniques to optimize website performance and loading times.

### REVUS CAR

- Developed a dynamic and responsive car website using HTML, CSS, TypeScript, React, and Bootstrap, ensuring compatibility across various devices and screen sizes.
- Utilized TypeScript interfaces to define clear data types, promoting code robustness, and reducing potential errors, while implementing custom hooks like useParams and useContext for handling undefined cases, alongside React hooks for efficient state management and lifecycle methods.
- Employed styled components and Sass for efficient styling and maintainability of the codebase, encapsulating styling logic, and promoting code reusability.
- Implemented code splitting techniques to enhance website performance and optimize loading times, improving user experience.

## EXPERIENCE

---

### FRONT-END DEVELOPER

2023 - Present

- Successfully completed multiple freelance projects, demonstrating strong initiative, time management, and problem-solving skills while consistently meeting client requirements and deadlines.
- Earning positive client feedback for delivering high-quality results and maintaining effective communication to meet project requirements.

**Technical Skills:** HTML, CSS, Javascript, Typescript, React.js, Sass, Bootstrap, Git, GitHub, Problem solving

**Languages:** Arabic, English
